#### X816/75/01

## **Computing Science**

WEDNESDAY, 22 MAY 9:00 AM - 11:00 AM

Mark

Forename(s) Surname	Number of seat
Date of birth Day Month Year Scotti:	sh candidate number

Total marks — 110

SECTION 1 — 25 marks

Attempt ALL questions.

SECTION 2 — 85 marks

Attempt ALL questions.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use blue or black ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

1

#### SECTION 1 — 25 marks Attempt ALL questions

1.	Convert the following 8-bit binary number into denary.
Comp Sys	
comp cyc	1011 1001

2. Add HTML body, h1 and title opening and closing elements to complete the code below. 3

**SDD** 

DDD

A bank requires a program for loan applications. The user will enter how much money they want to borrow and the number of monthly repayments. The user will then be informed how much they must repay each month.

Using the information above, design a user interface for the program.

3

4.	The sorted output below was produced by running a query in a database.

Product			
productCode	productName	manufacturer	description
366	Picture Frame	Frame Design	Silver
439	Crystal Vase	Glass Gifts	10cm
316	Glass Bowl	Glass Gifts	20cm
285	Scented Candle	WaxWorks	Vanilla
123	Candle Holder	WaxWorks	Glass jar
56	Tea Lights	WaxWorks	Pack of 6
112	Place Mats	Zingy Zebra	Pack of 5

Complete the SQL statement used to produce this sorted output.

2

SELECT productCode, productName, manufacturer, description

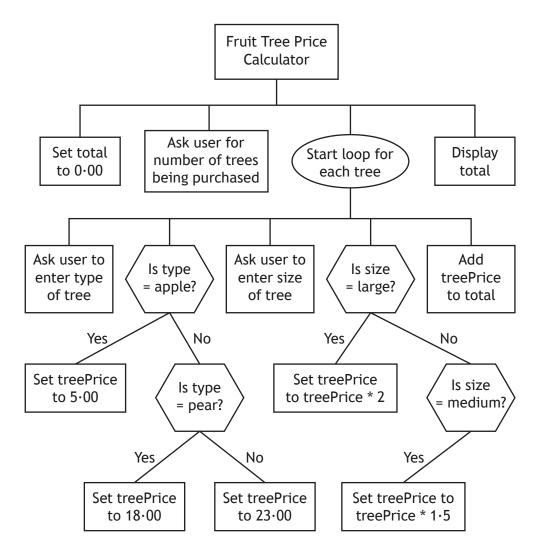

FROM Product

SDD

A garden centre requires a program to calculate the price of apple, pear and cherry trees being sold.

The design is shown below.

(a) State the type of loop shown in the design above.

1

1

(b) The design is tested. For the following inputs state the total displayed.

Inputs Total displayed Number of trees - 2 Type of tree – cherry Size of tree - small Type of tree - pear Size of tree - medium

MARKS	DO NOT WRITE IN THIS
	MADCINI

SDD

(c)	The garden centre is considering selling orange trees for £23.00.		
	Explain why the design does not need to be changed.	1

#### **WDD**

An archaeology club wants a website to provide information about the club and how to join.

A screenshot of the completed home page is shown below.

# **Archaeology Club**

Welcome to the website for the Archaeology Club. Here you will find links to the different pages on the site as well as lots of information about different aspects of archaeology.

Areas of the site:

- Fossils
- Dino facts

The club is part of the British Archeological Society

Evaluate the website in terms of its fitness for purpose.

#### SDD

Part of a program requires a user to input the total score achieved when they roll a pair of six-sided dice.

For example, if the user rolled a 4 and a 1 they would input 5.

a)	State the extreme values required to test this part of the program.	2
	Extreme 1	
	Extreme 2	
o)	The code below shows part of the program.	
	FOR loop FROM 1 TO 100 DO  RECEIVE diceScore FROM KEYBOARD  SET total TO total + diceScore  END FOR	
	State the standard algorithm shown above.	1

page 07

8. Three records from a database table are shown below.

DDD

Book			
bookRef	title	author	publisher
0783567328120	The Cat's Pyjamas	R J Petersen	Germiston
0703487922417	Grass Is Green	V R Singh	East Rand
0724603125633	Climb the Hill	R McGrath	Brown

(a) State a suitable type of validation for the bookRef field.

1

(b) Another book by V R Singh is to be added to the table.

The SQL statement below is used to insert this record.

INSERT INTO Book (bookRef, title, author, publisher)
VALUES ("0745198374564","V R Singh","I'll Do It
Yesterday","East Rand");

Explain why the SQL statement will not produce the intended result.

2

9. The HTML code below is used to create a web page.

**WDD** 

```
<html>
<head>
<title> French Facts </title>
<style>
h1 {text-align:right}
</style>
<head>
<body>
<h1> France </h1>
 Facts about France: 
<l
Capital: Paris 
Population: 67 m 
Flag: tricolour 
</body>
</html>
```

Draw how this web page will look when viewed in a browser.

Some of the content has already been added.

page 09

10.	A database query design includes the following conditions in the search criteria.	
	delivery > 01/05/2019 AND delivery < 31/05/2019	
DDD	(a) State the attribute type used above.	1
Comp Sys	(b) State the part of the processor where these conditions will be evaluated.	1
11. SDD	The programming language below uses & to concatenate two strings.  SET message TO "hello" & "world"	
	When coding, a programmer types $\pounds$ instead of $\&$ leading to an error. State the type of programming error and describe its effect. Type	2
	Effect	
12. Comp Sys	The line below is stored as a vector graphic.	
	State one attribute of this object.	1

page 33

**SDD** 

A fairground game involves throwing balls through holes in a large wooden board. Each hole scores different points.

> The game is played using the following four rules.

- 1. A player starts with 3 balls and throws them one at a time.
- 2. If a ball is successfully thrown through a hole the points are added onto the player's score.
- 3. The game ends immediately if a player's score is greater than or equal to
- 4. If the score reaches exactly 50 points the player is told they have won a prize.

A program is written to keep the score for a player.

```
Line 3
        DECLARE total INITIALLY 0
Line 4
        DECLARE balls INITIALLY 3
Line 5
        WHILE total < 50 AND balls > 0 DO
Line 6
           RECEIVE ballScoreOne FROM KEYBOARD
Line 7
           SET total TO total + ballScoreOne
Line 8
           SET balls TO balls - 1
Line 9
          RECEIVE ballScoreTwo FROM KEYBOARD
Line 10
           SET total TO total + ballScoreTwo
Line 11
           SET balls TO balls - 1
Line 12
          RECEIVE ballScoreThree FROM KEYBOARD
Line 13
           SET total TO total + ballScoreThree
Line 14
           SET balls TO balls - 1
Line 15
        END WHILE
Line 16
        SEND "Well done! You have won a prize." TO DISPLAY
```

- (a) Identify one logical operator in the above code.
- (b) The program runs but does not meet the functional requirements stated in the rules.
  - (i) State the type of error that has occurred.

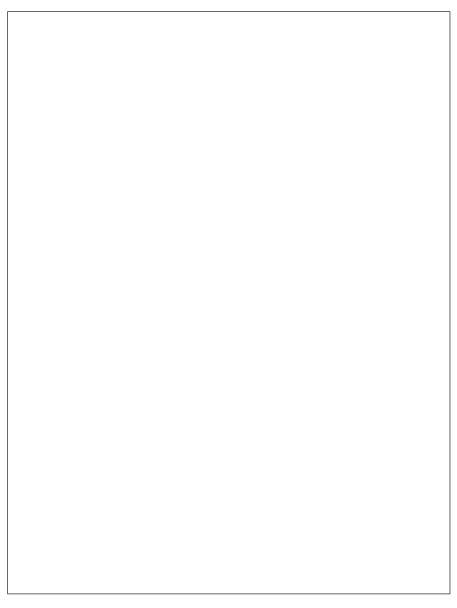

1

#### 19. (b) (continued)

(ii) The program has been edited as shown, but still breaks rule 3 and rule 4 of the game.

Line 3 DECLARE total INITIALLY 0 Line 4 DECLARE balls INITIALLY 3 Line 5 WHILE total < 50 AND balls > 0 DO Line 6 RECEIVE ballScore FROM KEYBOARD Line 7 SET total TO total + ballScore Line 8 SET balls TO balls - 1 Line 9 END WHILE Line 10 SEND "Well done! You have won a prize." TO DISPLAY

Using a design technique of your choice, design a solution that meets the requirements of all four game rules.

page 35 [Turn over

**SDD** 

(c) A single ball can achieve a variety of different possible scores.

Two versions of input validation were coded and tested to check that only valid scores are entered.

Version	A
 Line 6 Line 7 Line 8 Line 9	WHILE ballScore < 0 OR ballScore > 75 DO  RECEIVE ballScore FROM KEYBOARD
Version	В
Line 1	DECLARE possScore INITIALLY [0,5,20,25,30,50,75]
Line 6 Line 7 Line 8 Line 9 Line 1 Line 1 Line 1	REPEAT  RECEIVE ballScore FROM KEYBOARD  FOR check FROM 0 TO length(possScore)-1 DO  IF possScore[check] = ballScore THEN  SET found TO true  END IF  END FOR
